

SUPPORTING CHANNEL FROM GALVANIZED STEEL FOR PPR PIPES \varnothing 20-75 mm

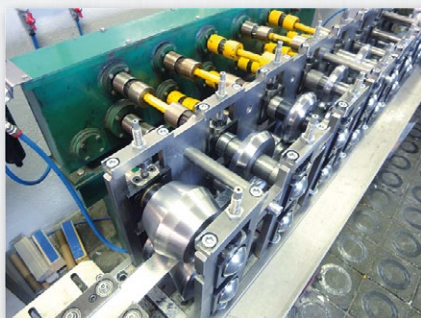

The channels are made of high quality galvanized steel strip Dx51D by roll forming which ensures precise shape of the channel along the whole length of the profile and exact length tolerances. This method of production assures both the flexibility of supply according to the customer's needs and a good price for a high volume buyer. It is possible to make any length of the channel by request. The type of channel is clearly marked inside of each piece in several places i.e. KZ-20 to KZ-75.

Type	Designation	Picture	Lenght (mm)	Thickness (mm)	Weight (kg)	Packed pieces (pcs)
KZ-20	Clip channel galvanized for pipe \varnothing 20 mm		2000	0.5	0.32	25
KZ-25	Clip channel galvanized for pipe \varnothing 25 mm		2000	0.5	0.40	25
KZ-32	Clip channel galvanized for pipe \varnothing 32 mm		2000	0.5	0.48	25
KZ-40	Clip channel galvanized for pipe \varnothing 40 mm		2000	0.5	0.57	20
KZ-50	Clip channel galvanized for pipe \varnothing 50 mm		2000	0.5	0.70	20
KZ-63	Clip channel galvanized for pipe \varnothing 63 mm		2000	0.5	0.82	15
KZ-75	Clip channel galvanized for pipe \varnothing 75 mm		2000	0.5	0.95	15
