

THIN WALLED PROFILES MADE TO ORDER

THIN WALLED PERFORATED PROFILES

Attl a spol.s.r.o. Tovarna na stroje offers custom production of thin walled metal profiles on their own roll forming machines to customer's specifications. The offered range includes thin walled perforated profiles. This service is suitable for relatively small orders or in case the volume needed does not justify investing in one's own roll-forming machine

Limiting parameters for metal profiles made on our mills:

Width of entry strip material	20–200 mm
Thickness of the strip	0.1–2 mm
Length range	500–6000 mm
Materials	Fe, FeZn, Inox, Cu, Al
Punching	Yes
Dividing by shear	Yes

The price is based on profile complexity and the number of pieces ordered. The customer pays for the forming, dividing and punching tooling where applicable and of course for the production itself. The price is usually given for a common meter. The products are packed in returnable cases or as required and negotiated by the customer. The deliveries are FCA Praha 10 or DDU price can be negotiated.
